## The Purpose of this Curriculum Companion Guide is...

to provide information on the latest special education curriculum and resource options that support special populations in the moderate to severe ranges. This catalog is a resource for special education teachers, specifically those teaching in a center based classroom setting using the Michigan Essential Elements. This resource includes a description of each curriculum, supplemental resources, tools, targeted grade levels and content areas, research behind each program resource, images and website links.

Some of the resources listed within this document are commonly used throughout the county to provide support/supplemental curriculum and enrichment activities for students with moderate to severe disabilities and have been selected based on individual curriculum/IEP teams at the district level. Wayne RESA does not endorse any of the companies listed in this resource and do not take the place of district level curriculum decisions. This resource is for informational purposes only for our member districts.

If you have any questions regarding this catalog, please contact:  
Kate Pearson, Essential Elements Consultant, at [pearsok@resa.net](mailto:pearsok@resa.net).
